EQUIPMENT TECHNICIAN
Ronnie Goodlund

Faculty
Matthew J. James
Matty Mookerjee
Michael E. Smith

Programs Offered
Bachelor of Science in Geology
Bachelor of Arts in Earth Science
Minor in Geology
Minor in Paleontology
Secondary Education Teaching Credential Preparation

Geology is the study of the materials, structures, processes, and history of the earth. Philosophically, it allows us to realize our place in the physical universe within the enormity of geologic time. Practically, it leads to understanding of earth processes, the formation of rocks and minerals, and the energy supplies and materials that support our civilization.

The evolution of modern geologic thought is based on field studies and empiricism. A solid foundation in quantitative field and laboratory analysis provides a firm background in the principles of geology. Students take a fundamental curriculum that concentrates on the analysis of rocks and minerals, geologic mapping, and report writing. Required courses in physics, chemistry, and mathematics support understanding of geologic principles.

Careers in Geology and Earth Science

Within the general field of geology, students may choose from major programs that lead to either a B.S. in Geology or a B.A. in Earth Science. The B.S. in Geology provides an excellent background for graduate school and for work in geology in such fields as engineering geology, environmental geology, hydrology, and mineral exploration. Many of our geology graduates work for consulting firms with specialties in one or more of these areas. The B.A. in Earth Science provides our students with the background to become teachers, environmental consultants, to work in the energy industry or in governmental positions. Because of the selectivity involved in choosing a program that meets their own particular interests and goals, students must consult with a departmental advisor about their plan of study and their course load each semester.

Bachelor of Science in Geology

(See pages 147-148 for sample four-year programs.)

This plan is intended to give the student basic professional competence in geology. A calculus-based series of support courses is highly recommended for students intending to pursue a more quantitative geoscience career. It provides an excellent foundation for graduate school or a professional career in the geosciences such as a Professional Geologist, Hydrologist, or Geophysicist registered with the State of California.

Sonoma State University 2013-2014 Catalog
Bachelor of Arts in Earth Science

The Earth Science B.A. is designed to provide students with a firm foundation in the geological sciences. A diversity of elective courses allow students interested in related fields to build a supplementary minor. It provides a clear path to graduation and is ideal for students pursuing careers in earth science education, state agencies, environmental geology, and hydrogeology.

### Required Major Core Courses

**(I) One 100-Level Geology Course**
- GEOL 102+§ 3
- GEOL 105+ 3
- GEOL 107 3
- GEOL 110 3
- GEOL 120 3

**(II) Both of the Following**
- GEOL 303 Advanced Principles of Geology# 4
- GEOL 304 Geologic Mapping and Report Writing 1

**(III) Two of the Following 300-Level Courses**
- GEOL 307/308 Igneous and Metamorphic Petrology and Field Course† 5
- GEOL 311/312 Sedimentary Geology and Field Course 5
- GEOL 313/314 Paleontology and Field Course 5
- GEOL 317/318 Structural Geology and Field Course 5

**Total units in the major core** 18

**(IV) Major Electives**

Choose 33 additional units of Earth Science-related courses in consultation with a major advisor. See list of suggested courses on the following page. Major Elective courses must be approved by a major advisor. At least 20 units must be 200-level or above, and at least 15 units must be Geology courses.

**Total units in major electives** 33

---

**Required Supporting Courses**

**MATH 107**
- or MATH 161 4

**CHEM 102**§
- or CHEM 110 3
- or CHEM 115A 3

Any 100 or 200-level Physics or Astronomy course 3-5

**Total units in supporting courses** 10-14

**Total units in the major** 61-65*

---

* The standard 51 units of GE are reduced by 3 units each from GEOL 102, GEOL 303, and MATH 161, which are major requirements. These three classes satisfy requirements in GE categories B1, B3, and B4, respectively.

† GEOL 310 may be substituted.

+ Also counts toward GE B1 requirement
# Also counts toward GE B3 requirement
§ Satisfies GE lab requirement
†† GEOL 205 is a prerequisite
** Also counts towards GE B4 requirement

---

**Suggested Major Elective Courses**

**Geology**

- GEOL 102 Our Dynamic Earth 3
- GEOL 105 The Age of Dinosaurs 3
- GEOL 107 Introduction to Earth Science 3
  - Highly recommended for students pursuing a teaching credential
- GEOL 110 Natural Disasters 3
- GEOL 120 Regional Field Geology 3
- GEOL 205 Mineralogy 4
- GEOL 301 Natural History of the Hawaiian Islands 3
- GEOL 302 The Geology of Climate Change 3
- GEOL 306 Environmental Geology 3
- GEOL 307 Igneous and Metamorphic Petrology 4
- GEOL 308 Igneous and Metamorphic Petrology Field Course 1
- GEOL 310 Geophysics 4
- GEOL 311 Sedimentary Geology 4
- GEOL 312 Sedimentary Geology Field Course 1
- GEOL 313 Paleontology 4
- GEOL 314 Paleontology Field Course 1
- GEOL 317 Structural Geology 4
- GEOL 318 Structural Geology Field Course 1
- GEOL 320 Basin Analysis 4
- GEOL 321 Burgess Shale Paleontology 3
- GEOL 323 Hydrology 3
- GEOL 326 Stratigraphy and Earth History 4
- GEOL 420 Integrated Field Experience 4
- GEOL 427 Advanced Field Geology 4
- GEOL 422 Geochemistry 3
- GEOL 425 Economic Geology 3
- GEOL 495 Special Studies 1-4

**Anthropology**

- ANTH 201 Introduction to Biological Anthropology 3
- ANTH 202 Introduction to Archaeology 3
- ANTH 301 Human Fossils and Evolution 4
  - ANTH 201 or BIOL 115 prerequisite
- ANTH 322 Historical Archaeology 4
- ANTH 315 World Prehistory 4
Studio Art
ARTS 202 Beginning Drawing 2-4

Astronomy
ASTR 100 Descriptive Astronomy 3
ASTR 231 Introductory Observational Astronomy 3
ASTR 350 Cosmology 3

Biology
BIOL 312 Biological Oceanography 3
BIOL 110, 115, or 121/122 pre- or corequisite
BIOL 333 Ecology
BIOL 121, 122, and MATH 165 prerequisite
BIOL 355 Marine Ecology
BIOL 121, 122, and MATH 165 prerequisite

Environmental Studies and Planning
ENSP 200 Global Environmental Issues 3
ENGL 101 or PHIL 101 prerequisite
ENSP 302 Applied Ecology 3-4
ENSP 309 Soil Science 3-4
ENSP 322 Conservation Biology 3-4
ENSP 302 and BIOL 122 prerequisite
ENSP 330 Energy, Technology and Society 4
ENSP 451 Water Regulation 3

Geography
GEOG 204 Global Environmental Systems 4
GEOG 205 Introduction to Map Reading and Interpretation 1
GEOG 315 Field Methods in Geography 2
GEOG 205 and MATH 165 prerequisite
GEOG 340 Conservation of Natural Resources 4
GEOG 360 Geomorphology
GEOG 204 and GEOL 102 prerequisite
GEOG 365 Biogeography and Landscape Ecology
BIOL 115, 121 or 122 prerequisite
GEOG 370 Weather and Climate 4
GEOG 204 prerequisite
GEOG 380 Remote Sensing and Image Processing 4
GEOG 205 prerequisite
GEOG 387 Geographic Information Systems 4
GEOG 205 prerequisite

Minor in Geology
Completion of a minimum of 20 units from Geology Department courses will constitute a minor in geology. Six of the 20 units must be upper-division. Students should consult with an advisor in the Geology Department regarding required courses.

Minor in Paleontology

PROGRAM COORDINATOR
Matthew J. James / Geology Department (707) 664-2301, james@sonoma.edu

ADVISORS
Matthew J. James / Geology Department (707) 664-2301, james@sonoma.edu
Nicholas R. Geist / Biology Department (707) 664-3056, geist@sonoma.edu
Karin E. Jaffe / Anthropology Department (707) 664-2944, karin.jaffe@sonoma.edu
Alexis Boutin / Anthropology Department (707) 664-2729, alexis.boutin@sonoma.edu

Minor in Paleontology
The Minor in Paleontology offers students from any major on the SSU campus a cross-disciplinary concentration in the study of ancient life on Earth. Paleontology is by its very nature an inter-disciplinary field of study, blending both laboratory and field studies of modern organisms and extinct organisms. Some paleontologists approach the field from a geological perspective, and others approach it from a biological perspective. For a Minor in Paleontology, students must complete 20 units as described below.

Minor Core Requirements

<table>
<thead>
<tr>
<th>Units</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>11</td>
<td>GEOL 102 Our Dynamic Earth 3</td>
</tr>
<tr>
<td></td>
<td>GEOL 313 Paleontology 4</td>
</tr>
<tr>
<td></td>
<td>BIOL 121 Diversity, Structure, and Function, or BIOL 122 Genetics, Evolution, and Ecology 4</td>
</tr>
<tr>
<td></td>
<td>Total units in the minor core 11</td>
</tr>
</tbody>
</table>

Minor Electives
In addition to the Minor Core, choose 9 units of electives from other paleontology courses and/or courses with an emphasis on interpreting the history of life on Earth, and at least 1 unit that is a field course (marked by asterisk below). All SSU majors may select the Minor in Paleontology, and if you are majoring in either Biology or Geology, at least 3 upper division elective units must be from outside your home department. Additional courses may be counted toward the minor with approval of one of the minor advisors above. The 9 elective units must include at least one 4-unit upper division course with a laboratory from the following list:

<table>
<thead>
<tr>
<th>Units</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>ANTH 301 Human Fossils and Evolution</td>
</tr>
<tr>
<td>4</td>
<td>ANTH 326 Bioarchaeology [Topics in Archaeology]</td>
</tr>
<tr>
<td>4</td>
<td>ANTH 412 Human Osteology</td>
</tr>
<tr>

<td>*ANTH 415 Forensic Anthropology</td>
</tr>
<tr>
<td>4</td>
<td>*BIOL 220 Human Anatomy</td>
</tr>
<tr>
<td>4</td>
<td>*BIOL 322 Invertebrate Biology</td>
</tr>
<tr>
<td>4</td>
<td>*BIOL 327 Vertebrate Biology</td>
</tr>
</tbody>
</table>
† BIOL 328 Vertebrate Evolution and Morphology 4
BIOL 385 Biology of the Dinosaurs 3
GEOG 370 Weather and Climate 4
GEOG 372 Climate Change 4
GEOL 105 The Age of Dinosaurs 3
GEOL 120 Regional Field Geology 3
GEOL 302 Geology of Climate Change 3
* GEOL 303 Advanced Principles of Geology 4
* GEOL 304 Geologic Mapping and Report Writing 1
* GEOL 314 Paleontology Field Course 1
* GEOL 321 Burgess Shale Paleontology 3
* GEOL 326 Stratigraphy and Earth History 4

Total elective units in the minor 9

* Field courses – one course is required for the minor
† 4-unit laboratory courses – one course is required for the minor
Some of these elective courses above might have additional prerequisites not listed here. Refer to the University catalog for additional information.

Total units for the paleontology minor 20

Secondary Education Teaching Credential Preparation

Geology and Earth Science students must demonstrate competence in the natural sciences by passing the subject matter examination required by the California Commission on Teacher Credentialing (CCTC). One part of the examination will test breadth of knowledge in biology, chemistry, physics, astronomy, and geology. Another part of the examination will test depth of knowledge in a particular area, such as geology. The B.S. in Geology or the B.A. in Earth Science degrees are recommended to prepare for the part of the examination that tests depth of knowledge in geology. For recommended course selection to help prepare for the part of the examination that tests breadth of scientific knowledge, please see the Teaching Credential section of the SSU catalog. GEOL 107, Introduction to Earth Science, is specifically designed for students who are preparing to take the CCTC single-subject exam.

For more information, please contact the Department of Geology, (707) 664-2334.

Department Policy for Senior Theses (GEOL 426A/426B)

1. The student must have a 3.00 or higher departmental grade point average.
2. The student must have demonstrated ability to work independently and do quality work in both the lecture and field classes.
3. The student must have time in his/her schedule to complete two semesters of research (three credit hours each) and register for both 426A (in the Fall) and 426B (in the Spring).
4. The student must submit a detailed proposal of research, a schedule, a budget and an initial hypothesis.
5. The student must have a faculty sponsor who is willing to advise the project and will set up a schedule of meetings for this purpose.

6. Two copies of the final paper/report will be filed with the department office before a grade will be assigned.
7. The student will present the results of her/his project at the department colloquium.
