

Habitat for Humanity of Sonoma County provides several internship opportunities for students looking to gain work experience in human services, social work, economic education, advocacy, marketing, business administration, and construction management. Our internship allows the student to work alongside staff to contribute to our programs, provide services directly to partner families and participate in many aspects of ending poverty housing in Sonoma County.

Our interns are often interested in careers in criminal justice, psychology, social work, environmental studies, public administration, child development, construction management, business, and economics. We strive to give each intern a valuable learning experience while working in these fields. We have internship programs that can be completed as listed or in combination with other volunteer roles at Habitat for Humanity of Sonoma County.

We are looking for interns to help in the following areas:

Construction - Build	Life Skills Education	Economic Education
Donation Procurement	Development/Fundraising	Merchandising
Retail Business Management	Family Selection and Services	Business Administration
Youth Connection Mentor	Construction - Site Supervision	Social Media/Marketing

Habitat for Humanity of Sonoma County is dedicated to improving lives by building modest, affordable homes in partnership with our communities and families in need. Making home ownership a reality for hard-working families helps break the cycle of poverty. Our vision is for every person in Sonoma County to have a simple, decent and affordable place to live. We could not do this work without the help of volunteers and interns.

We help accomplish this task by operating ReStore, our home improvement outlet store that sells donated new, used and surplus goods to the public. All profits earned are used to build homes. ReStore is also working to keep Sonoma County green by diverting tons of construction waste from landfills and promoting the philosophy of reuse, recycle and repurpose. We continue our green philosophy by building LEED Qualified green built homes.
