Circuits 101 For High School Students

Are you curious about electronic circuits? Interested in exploring circuits that detect light and produce sound? Interested in building an AM radio receiver? If you responded 'yes' to any of these questions, then the Circuits 101 For High School Students workshop might be for you!

The goal of this workshop is to introduce interesting applications of circuits to high school students through hands-on Snap Circuit projects.

The workshop is funded by Circuits and Systems of IEEE and organized by the students, faculty and staff in the Electrical Engineering program at Sonoma State University.

When: June 8-11, from 9 a.m. to 12 a.m.

Where: Sonoma State University, Engineering Science Department

1801 East Cotati Avenue, Rohnert Park, CA 94928-3609

How to apply: http://goo.gl/forms/NqqNs1xo3A

Contact person: Dr. Jack Ou at jack.ou@sonoma.edu.

Important Dates:
Application deadline: May 15, 2015
Notification of acceptance: May 18, 2015
