

1) Navigate to the list of available applications.

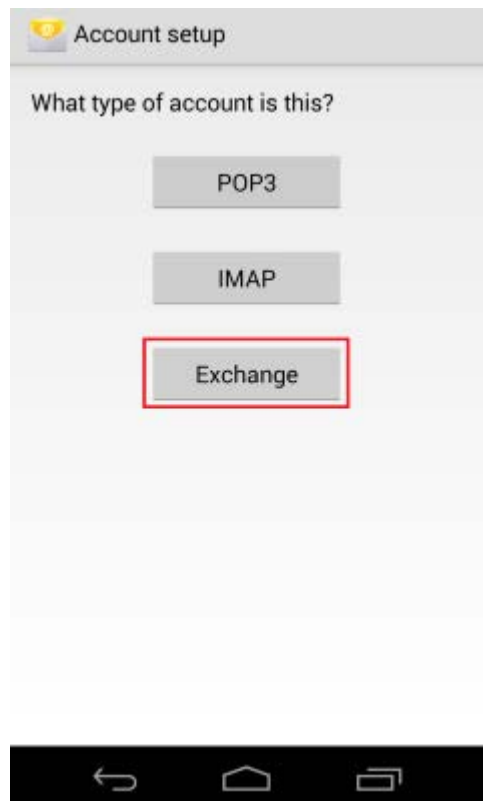

2) Launch the **Email** application.

3) Enter your SSU email address and password. Replace SeawolfID with your own username. Press **Next** when finished.

4) Select the **Exchange** account type.

5) Enter the following for each of the account setup fields:

Domain\Username – SOLAR\Your Seawolf ID

Password – Your Seawolf ID password

Server – exchange.sonoma.edu

Port – 443

Security type – SSL/TLS

Select **Next** when finished.

6) Select **OK** to confirm the remote security prompt.

Remote security administration

The server exchange.sonoma.edu requires that you allow it to remotely control some security features of your Android device. Do you want to finish setting up this account?

Cancel OK

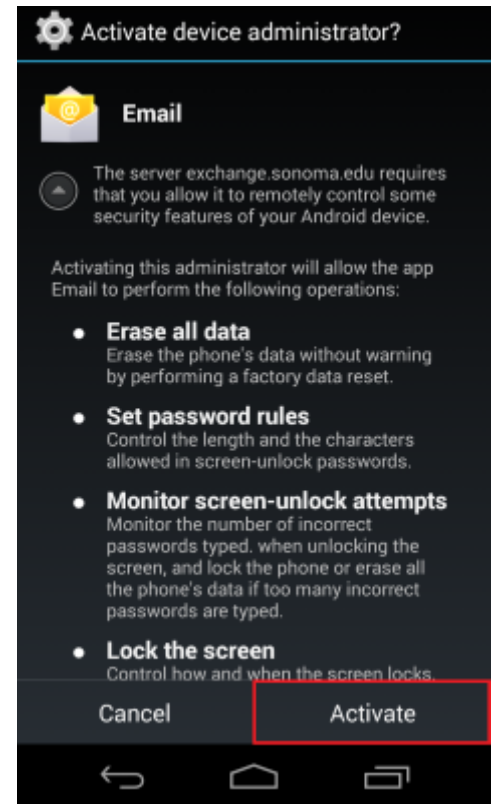

7) Set desired settings and select **Next**.

8) Select **OK** at the Security Update prompt.

10) Review the request to activate a device administrator and select **Activate** to agree.

11) Android devices are required to have screen lock enabled. If prompted, select **PIN** or **Password** to set a screen lock.

Once the screen lock has been set, email should begin to sync to the device. Open the **Email** application to access the newly setup account.
