

THE ENVIRONMENTAL MOVEMENT

Department of Environmental Studies & Planning
Department of Sociology
Sonoma State University

This syllabus is for a 3-semester-unit course, taught in a three-hour class once a week for 15 weeks.

Course Description:

The conservation and environmental movements have been important influences on American society across the Twentieth Century. We trace the American conservation movement from the organization of the Sierra Club and the first Audubon Societies in the 1890s through the New Deal, from the first campaigns to establish National Parks through the legislative victories for clean water, clean air, and wilderness protection in the early 1960s. We examine the transformation of the conservation movement into a new environmental movement after 1970. We explore the emergence of new types of activism and legal advocacy, the tension between national organizations and the grassroots, and the development of such new components as the environmental justice movement in communities of color. We also look at the emergence of a global environmental movement in the 1980s. Guided by a framework of social movement analysis, we pay close attention to the roles of organizations, resources, leadership, membership, values, political culture, and counter-movements.

Required Texts:

Stephen Fox, *The American Conservation Movement: John Muir and His Legacy* (Univ. of Wisconsin Press, 1981)

Douglas H. Strong, *Dreamers and Defenders: American Conservationists* (Univ. of Nebraska Press, 1988)

Robert Gottlieb, *Forcing the Spring: The Transformation of the American Environmental Movement* (Island Press, 1993)

Class Reader, containing:

Jim O'Brien, "Environmentalism as a Mass Movement: Historical Notes," from *Radical America*, Vol. 17, Nos. 2-3 (1983), pp. 7-27

David Walls, *The Activist's Almanac* (1993), section on the conservation and environmental movements

Course Requirements:

1. Attendance, preparation, and participation are essential. Attendance will be verified each class period. Participation in class discussions will count 15% of your grade. Unexcused absences will lower this score.
2. You will write several short (1-2 pages) reaction papers as assigned, to count 20% of your grade.
3. You will present to the class oral reports on assigned topics, sometimes as part of a collaborative team, and may be asked to serve on a reaction panel to videos, to count 15% of your grade.
4. You will complete a take-home mid-term assignment, to count 25% of your grade.
5. You will write a research paper (at least 10 pages, typed, double-spaced), to count 25% of your grade. The subject can be a local environmental action group, a local chapter or a national environmental organization, or an historical topic related to the conservation or environmental movements. Details on this assignment will be provided later. Plan to consult with the instructor on choice of topic.

Course Objectives:

1. You will be able to identify and date the emergence and development of the conservation movement, situate it in its historical period, and identify three or four leading people, organizations, and issues important to development of the movement;
2. You will be able to identify and date the emergence and development of the environmental movement, situate it in its historical period, and identify three or four leading people, organizations and issues important to development of the movement;
3. You will be able to apply a model of strategic analysis to the conservation and environmental movements which helps explain why they emerged when they did, who their constituencies were, and what circumstances allowed them to win victories;
4. You will be able to describe and characterize the backlash to the environmental movement that emerged in the 1980s and continues to date.
5. You will be able to describe the issues and challenges that face the environmental movement at the present.
